
FULLSTACK PROJECT 2020-2021

TITLE: RESUME CREATOR

Project Group Members

1. Student 1 : Vishal Verma (181500811)
 2. Student 2 : Aman Gulwani (181500069)
-

Project Supervisor :

Mr. Pankaj Kapoor

(Assistant Professor Department of Computer Engineering & Applications)

Introduction

This project aims at developing a website that builds the online Resume/CV of Students and Employees.

Using this website, people can minimize their tasks. This web application provides aid to people from around the country to build their Resume/CV.

It is mainly a web interface for users who are looking for the strong and contrasting Resume/CV to their relevance with many layouts of the pages that will be designed using the Front-end development technologies. This project will be available free of cost and easy to proceed for the employee or students to build their Resume/CV. Anyone can access this website to build Resume with their University or company layouts and logos on the page.

The objective of the project

This website helps the customer to build contrasting Resume/CV. It is designed in such a way that one can build Resume/CV from any place through online and can save them for later reference. It will provide a quick, free and easy building of the Resume.

Working Methodology

In this project the work is divided into 5 modules. In each module we will be performing the different tasks to reach the target. Modules are as follows. :

- ✚ Project software and hardware setup and designing the home page of Website.
- ✚ Creating the layouts of the pages of Resume/CV in next two weeks.
- ✚ Backend task will be completed in the fourth module.
- ✚ Last module is the backup module to look back at the project working and make it better.

Tools required

- ✚ **Hardware Requirements:** A computer with basic specifications : Intel I3 processor with 4GB RAM or more.
- ✚ **Software Requirements:** Visual Studio code, Github, Web browser, Adobe XD.

Team Contribution

- ✚ **Aman Gulwani** → Frontend web designing
- ✚ **Vishal Verma** → Data collector and Backend

Online Git Repository

https://github.com/aman-gulwani/Fullstack_Resume-creator_Project

Limitations of System Proposed

- ✚ This project is implemented for frontend only, backend is optional part.
- ✚ The page layouts are designed of limited logos of companies or universities only.

Conclusion

Our intention of this Project was to establish a contrasting, economical, easy and most importantly, a strong Resume/CV creator which can solve our Resume/CV building problems. Our proposed system for Resume/CV building comes under the field of Frontend web development. Our main objective was to design a website for Resume/CV creator is for easily availing the facility for the Students of our University and Faculty.
